

# CUUBE™ Case Study – 100 Series

San Pasqual Valley High School, Winterhaven, CA

CUUBE™ 100-SERIES GYMNASIUM

## Description

San Pasqual Valley High School (SPVHS) is a public high school within the San Pasqual Valley Unified School District (SPVUSD) in Winterhaven, California near the California and Arizona border. SPVHS has a 97% minority enrollment, majority being American Indian/Alaskan Native, with an enrollment of 190 students.

## Goals

SPVUSD wanted to purchase a brand new building to host a gym, multiple locker rooms, a wrestling room, bathrooms, offices and a foyer showcasing the school's many athletic accomplishments over the years. In addition, they wanted a space that could also be utilized by the community.

## Process

Despite a difficult time caused by global market escalation and volatility, TLS Choice was able to procure and fabricate the superstructure of the CUUBE™ 100-Series gymnasium building. Choice's densely populated network of manufacturer partners proved invaluable during this unprecedented time period. Choice worked hand-in-hand with the District's Architect of

Record to design, fabricate and complete the gym while adding three traditionally built structures attached to the perimeter of the DSA pre-check approved gym.

## Products and Systems

For the CUUBE™ gymnasium and adjacent rooms, Choice sourced all interior furnishings including retractable bleachers and stage, state-of-the-art audio and visual systems, MFMA Northern Hard Maple flooring, operable solar tubes, floor sleeves for volleyball posts, motor-operated basketball hoops and HVAC duct sleeves. The solar tubes provide eco-friendly and sustainable lighting.

## Project Results

SPVUSD and the surrounding community were extremely pleased with the results of their customized CUUBE™, the interior and exterior finishes and the speed in which the full structure was erected. The school now uses their gym daily for practices and physical education classes. They also lend their facilities to the community for cultural celebrations, performances and large meetings.
